

# Primavera Reader

Reader for XER schedules exported from Oracle® Primavera P6.

## What's new in PrimaveraReader™

PrimaveraReader 3.6

# The new way of viewing Project Schedules

Introduction to PrimaveraReader™

## Introduction

PrimaveraReader™ is a reader for project schedules created with Oracle® Primavera P6. It enables users to open and view project plans exported from Oracle® Primavera P6 in XER or XLS format.

This cost-effective solution is designed to deliver an overview of project plan details among all parties involved, requiring no other license than PrimaveraReader™ license.

## Key Features

- **Activities** – overview of the open project activities
- **Resources** – view the resource structure and details
- **WBS** – Work Breakdown Structure of the project
- **Projects** – view of the Enterprise Project Structure
- **Assignments** – resource allocation and cost info
- **OBS** – Organizational Breakdown Structure
- **Details** – detailed information for selections
- **Baselines** – compare different project versions
- **Auto filters** – find and filter specified tasks
- **Progress update** – status feedback on the activities
- **Trace logic** – visual overview of selected activities
- **Critical path** – shows critical activities for the project end.

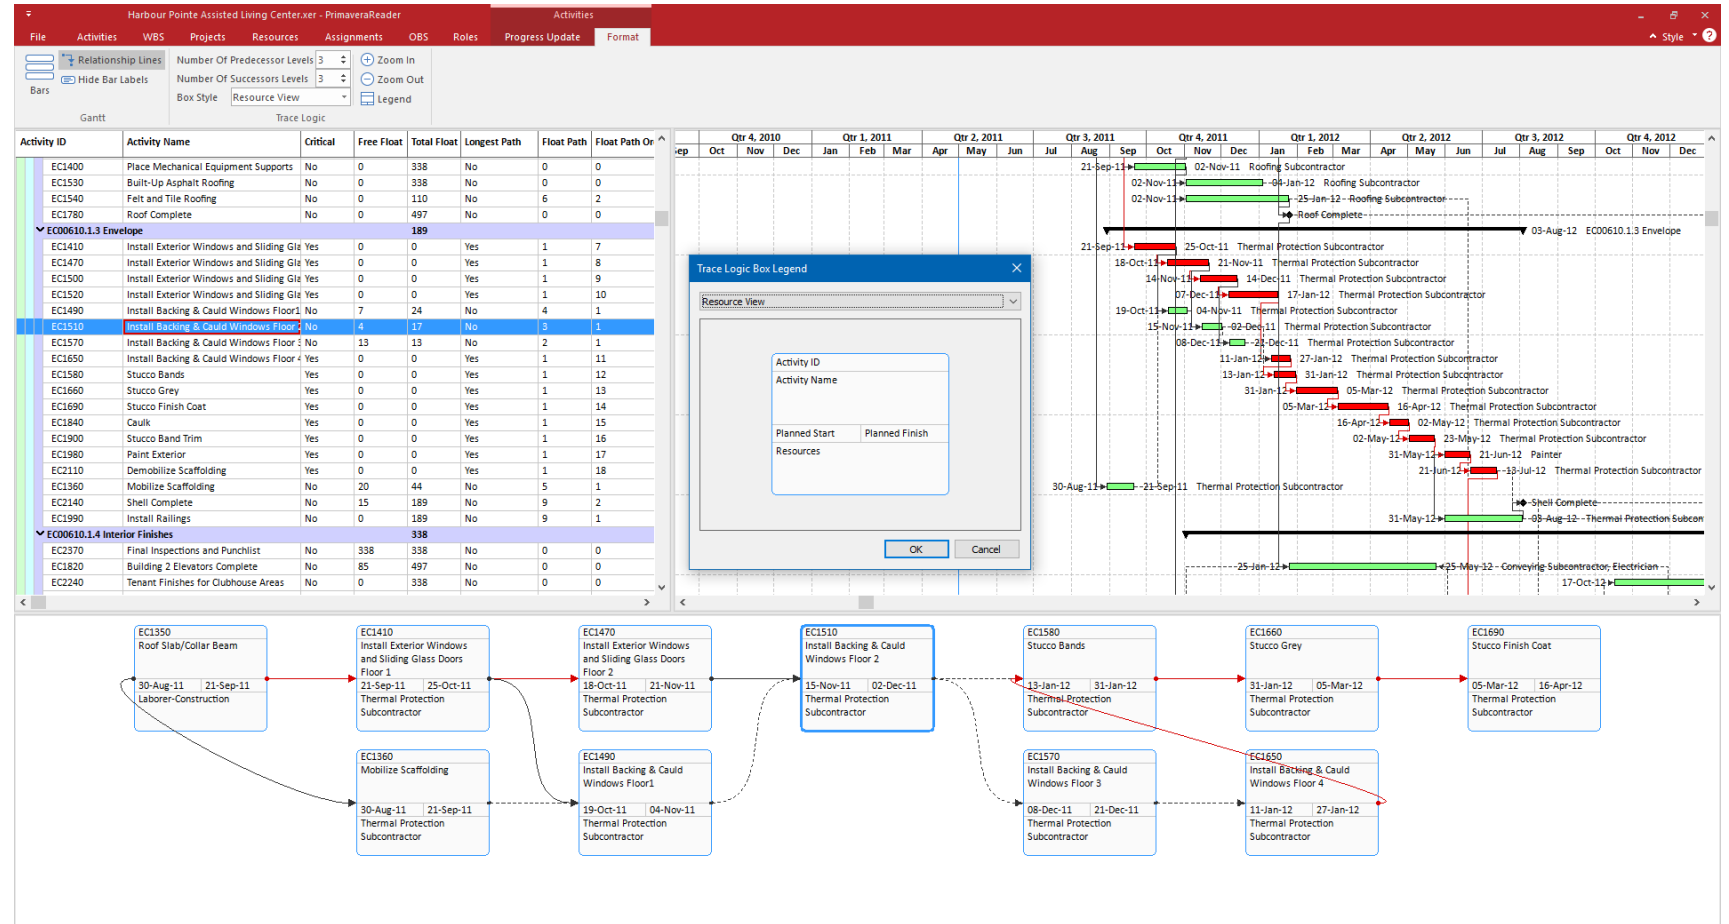

# Easy visual analysis and decision making

## Trace Logic View

### Trace Logic

The Trace Logic View is combined with the Activity View, and it shows the selected activity together with its predecessor and successor activities.

**Benefits:** Users can utilize the Trace Logic view to visually present selected activities of the project schedule, including critical path and prepare more detailed analyses.

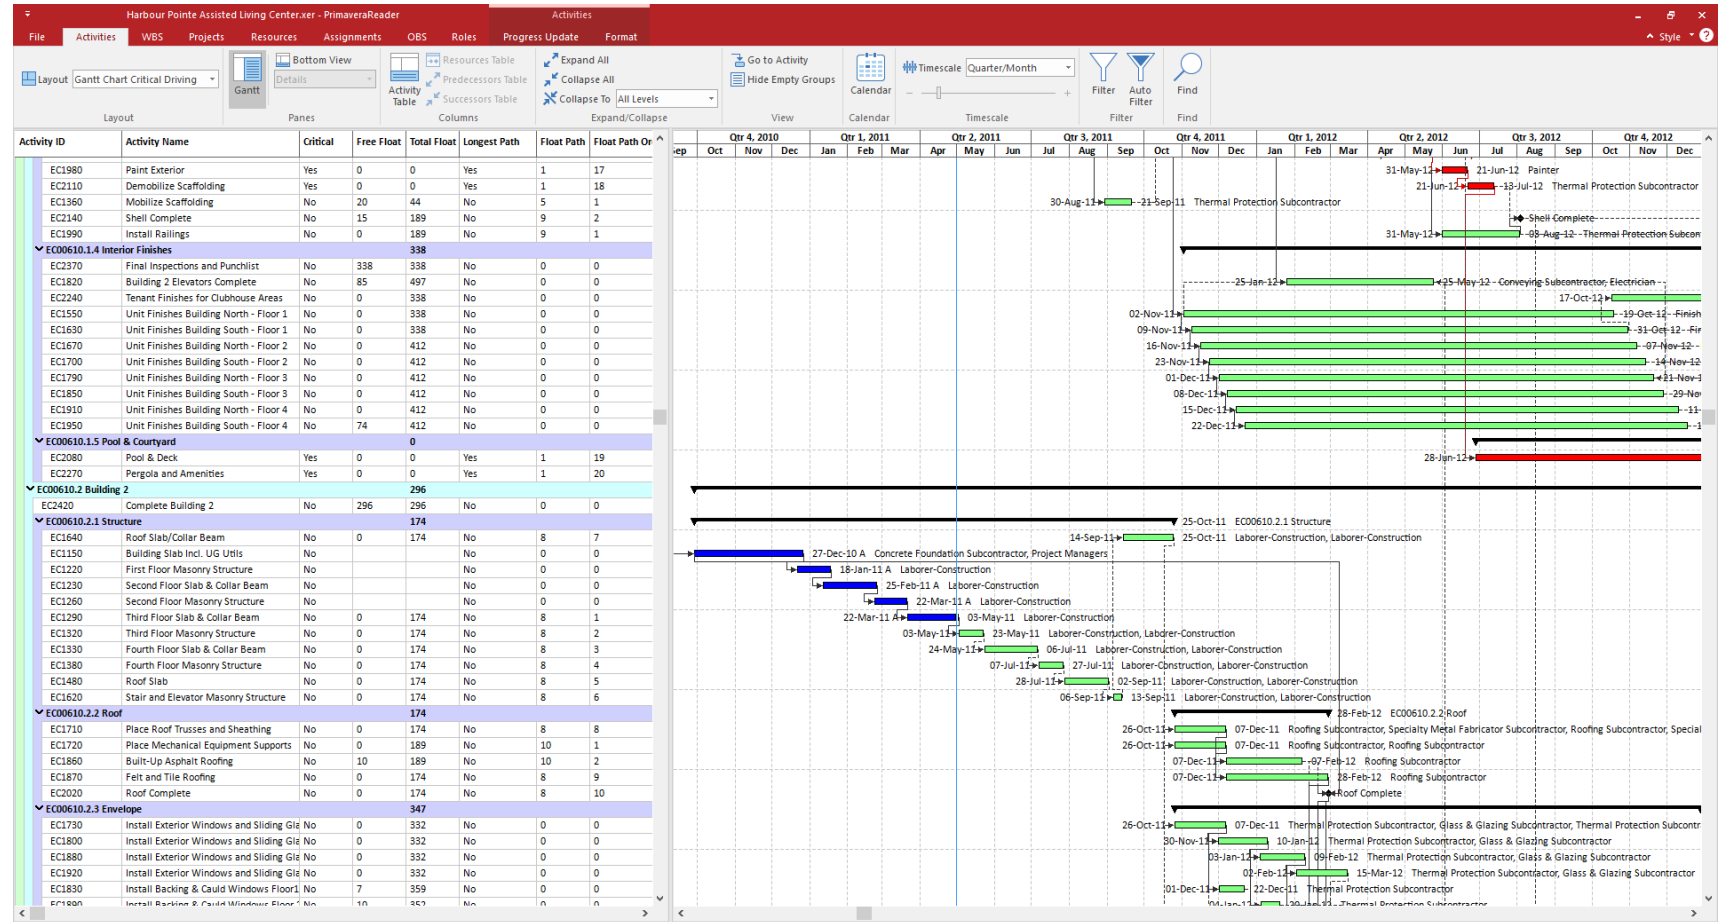

# Detect activities of great importance to the project deadline

## Critical Path + Driving Activities

### Critical Path

The Critical Path feature presents the chain of project schedule activities that determine the project end date.

**Benefits:** Users can monitor if there is any issue with the critical path activities. Thus, any delays with the project reaching the project milestones on time can be easily noticed and actions can be taken accordingly.

# Advantages over sharing schedules in PDF

Using PrimaveraReader™ will enhance the way your project team works.

# Why choose PrimaveraReader™ instead of sharing PDF files

5 main advantages over PDF printed schedules

## 1. Provide an Interactive overview of the project

Each member has a personalized view, chance to add/remove columns and see relationships inside an elaborate Gantt chart. Also there are Activities, WBS, IPS, resource assignments views, which offer full information regarding the specified topic.

## 2. Use Custom and Auto filters

The project team members have flexibility when viewing their Activities and Filters, which is a basic feature needed to easily handle plans that contain hundreds of lines / activities.

## 3. Navigate through predecessors and successors

Team members have a complete overview of the project relations and don't feel isolated from the whole.

## 4. Work with custom layouts (import .plf files)

The team members can import the company's custom layouts in PLF format or choose how assignment data is displayed in their view. Each layout shows different columns and applies different grouping and sorting of data.

## 5. Baselines comparison of project schedules

Users can easily spot what has been changed from the previous schedule with the clear visual comparison of the Activity updates from previous .xer file version.

# Improve project performance and save on costs

Main reasons for implementing PrimaveraReader™

## Reasons for implementing PrimaveraReader™

- Offers **dynamic working environment** for the whole project team
- Has intuitive user interface [requires no **learning curve**; no **training costs**]
- Provides all of the **important views** from Oracle® Primavera P6
- **Save on software licensing costs**
- Fast view of plan schedules **without import/ export in DB** [open +450K activities in 8 seconds]
- Matching company environment with **custom layouts & filters**
- It replaces the use of alternative **methods to share XER schedules** [like PDF reader]

Our solution is **flexible** in implementing **new features** to meet your organizational requirements!

**Primavera Reader**
